

FUSION Remote Option

Hire and keep the staff you need by offering at-home and remote transcription capability.

Use standard high speed dial-up for standard, uncompromising functionality that matches in-house capability.

Monitor, track and report on all remote workers' time and effort in transcription production.

On-line remote workers have the real-time advantage of report searching, printing, ADT demographics and more.

Safe and secure design protects your data and resolves application logins appropriately.

Securely Equip Remote Staff

The needs of remote transcription staff are expertly met with the FUSION Remote Option. This component matches the in-house tools and features for remotely connected staff by phone line, ISDN or broadband. If you don't have a VPN, FUSION Remote provides the tools to keep off-network staff productive.

On-Line Broadband and High Speed

The on-line configuration captures the advantages of high speed data lines to replicate on-network functionality. Report formats, ADT demographics, speed typing, physician databases, report search and all other features are fully functionally and available.

Off-Line Narrow-Band

A remote transcriptionists who does not have the advantage of a high speed can still work with all of the features of an on- network or high speed remote worker. Software configuration moves certain processing tasks to their local workFusion to even allow off-line or disconnected transcription with periodic and simplified dial-up and transmit capability.

Safe and Secure

Remote workers are effective while your data is not compromised with these carefully designed applications. Encrypted authentication and careful placement of patient demographics in the system are just a couple of the highlights of this safe-to-implement remote solution.
