

Your Transcription Workflow, Accelerated.

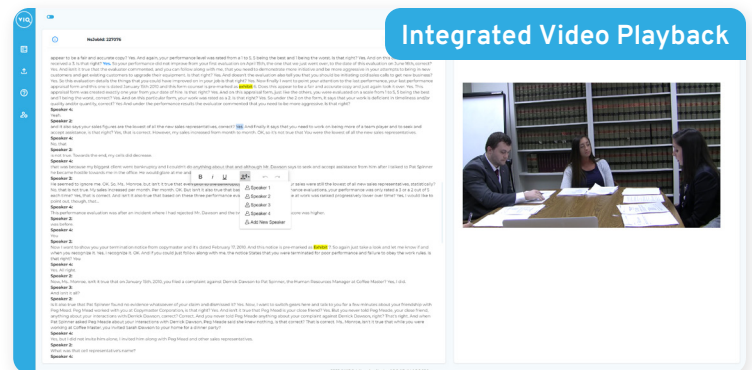

Easily upload audio and video files for AI-generated speech-to-text or human transcription

Gain more value from your audio and video recordings with an on-demand, online portal that allows you to upload any audio format files and supporting documentation to request an automated or verbatim transcript from VIQ Solutions. The volume of digitally recorded content that is captured during legal proceedings, law enforcement incidents, insurance claims, corporate meetings and other public events continues to accelerate, but with the implementation of technology and updated document workflows, you can scale effortlessly.

Simplified audio playback and transcript requests

NetScribe Connect is an online portal that allows clients to upload multiple audio files of any format, including interviews, testimonies, recorded calls, body cams, and dictated notes, to be transcribed in a timely manner. Clients can select their turnaround time, submit audio or videos and track the status of transcription requests.

NetScribe Connect delivers an easy-to-use and efficient end-to-end workflow for single and multi-speaker environments. Request an automatic FirstDraft for a highly accurate draft document returned within minutes for when verbatim transcription isn't needed or guarantee 99% accuracy by requesting VIQ professional transcription services all from within the portal.

Integrated video playback, synchronized with transcripts, provides unparalleled quality control.

Secure

Transcriptions are secured with industrial-strength encryption and additional protections.

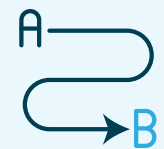

Efficient

Agnostic solution for uploading multiple files of any audio or video format to be collated into a single document.

Flexible

Option to submit for professional editing by VIQ or playback audio and download draft for self-editing.

User-friendly

Industry feedback drives easy-to-use interface, features and improvements.

Comprehensive

Upload, view and playback audio and video files, as well as submit, view and be alerted of the completed transcripts.

Manage Transcription Orders

Manage your pending and completed transcription orders from one dashboard. Review a transcript online, or easily download it and share.

Place a New Transcription Order

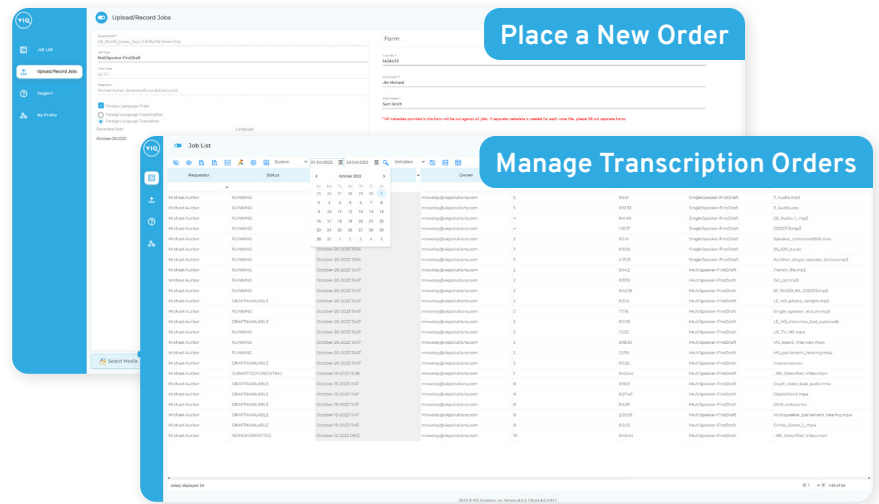

NetScribe makes it easy to upload previously recorded audio and video files. Enter speaker names, select foreign language translation options, and enter other relevant recording information.

Upload Multiple Records

Easily upload multiple media files at the same time. If you have two or more files and want a transcript for each file, choose Separate Transcripts. If you have multiple audio files that you want in one document, choose One Transcript.

MobileMic Pro™

Capture high-quality recordings using your smartphone and upload them for AI or human transcription.

Features and Benefits In Detail

Upload single or multiple audio/video files to be combined into a single transcript or converted to individual transcripts, as needed.

Directly record single speaker dictation and notes to be saved and transcribed in the web application.

Customizable request form to capture useful metadata to include in the formatted transcript.

Upload supporting documentation (PDFs, DOCX, etc.) and add typist notes.

View, Edit, Request VIQ services and Download recordings and transcripts from job list or export job list for reporting.

Domain-specific language models increase accuracy of speech recognition.

Hide jobs that are complete and filter open jobs by date, job ID, case #, author, and up to ten custom fields.

Single Sign-On login with current applications, such as Microsoft 365 and Cognito.

Integrate with your current systems utilizing NetScribe Connect's open API or SFTP.

Multi-speaker identification streamlines transcript review and formatting.

Take advantage of foreign language AI to translate and transcribe non-English recordings.

Customizable templates automatically format the transcript output.
