Fusion CAC™ is designed to enhance the manual process of coding and CDI by automating code suggestions at the point of document creation. Fusion CAC presents the coders with a list of preselected codes for verification, producing a faster process with more consistent results.

Fusion CAC can code all patient types from a single platform. The NLP software at the core of Fusion CAC is tuned to code charts using the ICD-10-CM-PCS and CPT4 code sets. Coders can realize productivity increases of 45% or more. As code updates and best practices change, Fusion CAC is taught to adapt to maintain a highly accurate outcome.

Fusion CAC was an early pioneer in computer-assisted coding with implementations producing tangible results from community hospitals to large, multi-site health systems. This combination of experience and innovation places you on the fast track towards capturing the advantage from the technology that is transforming medical coding.
Having successfully implemented and proven the results of computer-assisted coding, Dolbey is ready to introduce you to the next generation of benefits from CAC. Innovative customers have added ideas and new functionality. Fusion CAC has proven potential to dramatically enhance the coding workflow by providing a more standardized and streamlined process enabling coders to work smarter not harder.

- Single Platform for All Patient Types
- Code Suggestion Begins on ‘Day One’
- Management Dashboard
- Interactive MCE, OCE, NCD/LCD
- Auto Suggestion of Working DRG
- Automatic Workflow, Coding and CDI
- Query Opportunities Indicators
- Flexible QA Workflow
- Electronic Query Tools
- CDI Integration
- Concurrent Coding Ability
- Accepts Multiple Document Type Formats
- Integrates to Your Existing Encoder
SOPHISTICATED REPORTING

For many, the process of coding incorporates several systems. This leaves coding leadership with very few automated reporting tools. With Fusion CAC, you can report on nearly every event that occurs in your coding process. This new, innovative approach to outcome analysis can lead to smarter managerial decisions regarding staff, workflow, physician documentation and revenue.

The Dashboard gives you an at-a-glance view of your backlog, completed charts and billed charts in real time. For multi-site organizations, view data from the top or focus on the detail of one hospital or one group of users. Review statistics of expected revenue daily as well as inpatient and outpatient discharges. Drill down by day, by coder or by patient account to review the history of coding events and the system’s performance.

INTEGRATED ENCODER & RESEARCH TOOLS

Now, the most experienced Computer-Assisted Coding solution has an optional built-in encoder; everything you need in one single solution for coding and CDI.

This optional feature allows for you to replace or use your existing encoder; however, the value of the encoder has quickly changed with the advent of CAC. Coders don’t start with blank screens and reference material; they start with suggested codes and links into the supporting documentation. Fusion CACe™ takes this experience to the next level. Now, as coders validate the results of the CAC solution,
they have real-time exposure to edits and reference material to better determine the best code selection.

Fusion CACe offers a signature Research Pane providing Coders with reference material at their fingertips, further refining the coding process. This powerful tool is updated monthly to deliver the most up-to-date information for confidence in coding. Designed as a constant source of reference support without interfering in the coding process, the Research Pane provides as much or as little assistance as your Coders require.
Since 1914, Dolbey has delivered timely solutions with an emphasis on customer satisfaction. Our expert solutions, coupled with 24 hour support, make Dolbey the company to turn to for your fast changing requirements.

**DICTATION, TRANSCRIPTION, SPEECH, QUALITY & CODING SOLUTIONS**

**FUSION SUITE™**

The Fusion Suite is a set of healthcare software applications designed to deliver modular digital dictation, transcription, document management, speech recognition, coding and core measures in a single, integrated solution.

Designed for departmental or enterprise-wide deployment, the Fusion Suite delivers improved productivity in an end-to-end solution.

**HOW CAN WE HELP YOU?**

Find out how our award-winning solutions can add value to your organization. Contact us or visit our website for more information.
