Key Advantages

- Simple, easy to use digital recording software
- Captures up to eight independent channels of digital audio
- Records directly to harddrive with easy copy to servers, CD/DVDs or other storage devices
- Includes multiple language and interface profiles that can be customized to meet your specific terminology
- Customizable hotkeys and phrase lists for fast annotation
- Flexible solution that grows as your needs change: easily add video capture, integration with case management systems, or web-based access to recordings

About VIQ Continuum

VIQ Continuum is an ideal way to make the move to a digital recording system. With simple recording and playback controls, VIQ Continuum’s customizable graphical user interface is intuitive and easy to master. With VIQ Continuum, operators can record and monitor up to eight channels of audio, make synchronized text annotations, and easily export recordings in a variety of formats for backup or remote use.

VIQ Continuum records to the local harddrive, making it ideal for remote or mobile purposes, and can quickly export recordings to disk or server for backup or remote use.

VIQ Continuum offers a range of sophisticated add-on features that can enhance your recording and be added at any time without changing the familiar interface, including multiple channels of video capture and integration with case management systems.

www.viqsolutions.com
VIQ Continuum is a multi-channel digital audio recording software solution that is powerful and easy to use. Our customizable interface and hotkeys allow you to tailor the interface to match your specific needs, increasing your efficiency without disrupting your workflow.

Audio Capture and Annotations
- Records up to eight separate channels of digital audio
- Integrated text annotations and multimedia attachments, like electronic presentations or documents, become an official part of the digital record
- Independent confidence monitoring on all audio channels
- “Easy Search” feature quickly locates recordings based on a range of criteria including date/time, case number, or annotation text
- Customizable profiles, speaker/event buttons, hotkeys and case lists to facilitate detailed annotations and aid transcriptionists
- User-friendly, customizable graphical interface means minimal training required

Backup, Remote Use and Sharing
- One-click burning of basic CD/DVD for mixed-channel playback in standard disc player or digital music players
- One-click burning of advanced CD/DVD for multi-channel playback with annotations using free VIQ Player for transcription
- Easily archive audio and recording information to disk, network/external drives, or third-party data backup systems

Security and Privacy
- Able to seal recordings and provide only authorized users with access
- Able to mark portions of the recording as inadmissible or redact sections for sharing or public use
- User ID/password-controlled access to administrative functions such as audio deletion and configuration settings
- Customizable administrative audit logs detail all activity on the system

With VIQ Continuum, you can start with simple digital audio and video recording and add features and sophistication as you grow. Our flexible suite of digital recording solutions is scalable, with a clear migration path, allowing you to protect your investment.

Available Add-ons*
Enhance your Continuum software with the following upgrades:

- **Add Video**: Add two channels of 1080p video capture.
- **Max Video**: Add six channels of 1080p video capture.
- **Case Management Integration**: Using your case management system data, create customized case lists in advance and start recording with no data re-entry required.
- **Remote Playback**: With VIQ Media Manager, you can easily access recordings for remote playback or transcription.
- **Web-based Access**: Secure online access to audio and notes through a standard web browser with VIQ AccessPOINT Portal.

* Sold separately.

System Requirements
- Windows 7 Professional, Ultimate, or Enterprise (SP1) (64 bit)
- SQL Server 2008 R2 Express with Tools (SP1) (64 bit) installed
- IIS 7.5 installed
- Intel Core i5 2.0 GHz (Core i7 3.0 Quad or higher if capturing video)
- 4GB RAM (8GB RAM min. if capturing video)
- High capacity 7200 RPM (min.) hard drive (Disk space depends on storage requirements)
- 1024 x 768 display resolution (32-bit color depth min.)
- WDM-compatible audio device for playback
- ASIO-based digital recording device or Digigram card. USB 2.0 port or PCI slot may be required.
- Contact VIQ for full list of compatible recording devices. Additional hardware may be required for video capture.
